F6601

A family of lights inspired by old armour. A perfect combination of decorative and pleasant direct light that gives character to any space. A very feminine form that comes alive when the light escapes in a gentle way through out the different layers, creating an interesting game of light and shadow. The bases, cut on the steel sheet and lacquer on-verse, give a delicate feel and at the same time reflects the light perfectly. These low energy lights ensure great intensity of light with minimum energy consumption.

lumeplus

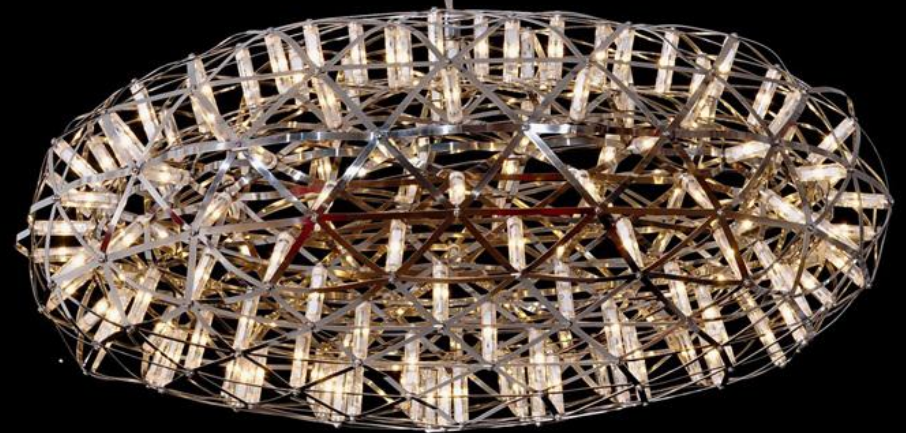

P8606

This lamp explores the potentials of artificial and natural light in the lighting design field.
One of sitting points is the etched lampshade in round shape. The whole sphere composed of irregular pentagons. Five pentagons combined into a treatment. Treatments form into a smooth sphere at last. When the lamp is turned on, complicated and sharp pointed light will be projected.
