## LP-TLB-2030

### 360° Diffusion lighting

Evenly distributes light in all directions (360°). It attracts a relaxed gaze toward the light source, creating a serene and very comfortable atmosphere. The light globe baptizes all surfaces of the space in light, producing a tranquil, richer, and extremely even environment.

## LP-TLH-123

### Directed diffusion lighting

Emits soft light, creating low contrast between the illuminated area and the projected shadows. The opaque part of the lampshade helps guide light through the diffuser, providing both serene and focused lighting effects.

## LP-TLF10

### Directed Diffusion Lighting

Emits soft light, creating a low contrast between the illuminated area and the cast shadows. This type of lighting is particularly suitable for reading scenarios or when the light is directly visible, as it does not produce glaring light.

Ø10cm  
2700–6000K

## LP-TLD-1020

### Directed Diffusion Lighting

High uniformity, and it generates the primary layer of lighting. Soft shadows and gentle brightness in this illumination, where space and its components do not exhibit visual hierarchy.
