

The Perfect Solution for Long Spaces With a single length offers 30 Mt seamless illumination, ensuring continuous lighting experience.

LP5270- Single length From 1.2M customized to 30Mts No Joints

Seamless linear lighting that provides a continuous uninterrupted line of light. Often used for architectural and interior design to create a sleek modern look, allowing seamless illumination without visible gaps or breaks. creating lighting effects, or enhance the overall ambiance of a space.

Unique Features 30mts single length /easy maintenance

- CNC cut out for easy replacement of LED Drivers .
- Seamless snap in diffuser single length in rolls 30Meter Max
- Easy removable LED module rectification done only at the faulty spot
- Seamless zero joint with I connectors external & Internal
- Standard lengths 1200mm /1600mm /2400mm linkable to 30meter Max
- Sand Blasted Finish provides a rich organic luxurious finish Powder coating Collection meets Qualicoat Class 1 and 2 performance requirements ,complies with AMAA 2603 and 2604.

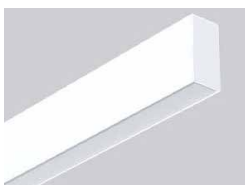

PRODUCT OPTIONS	
Power Supply	Constant Current 24 -42Vdc 850mA to 1700mA
LED source CRI	High lumen LED Modules 160lm/watt CRI80 / CRI90
Lifetime	50,000 hrs
Mounting type	Surface or Suspended
Finish	White, Black, Silver, Graphite, Copper, Champagne Gold
Emergency:	DALI or Standard emergency conversion
Operating voltage:	220-240vac 50/60hz
IP Rating:	IP33 /IP40 Rated version
Light source:	CC LED Modules 2853 SMD High Power LEDs
Driver:	1-10V, DALI, Touch Dim,Digital Zone Dimming
Color temperature	3000K -4000K
Diffuser	Opal snap in diffuser seamless 30M single length

CHOOSE A MODULAR LENGTH AND LIGHT SOURCE@ 4000K

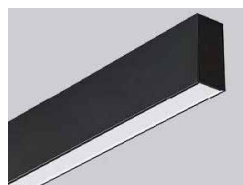

Length	Power	Source lumen	LED qty	
1200mm	40W	6400lm	144leds	550lux
1600mm	80W	12800lm	288leds	1000lux
2400mm	160W	25600lm	576leds	1700lux

HYPERMARKET MODULAR LENGTH AND LIGHT SOURCE@ 4000K

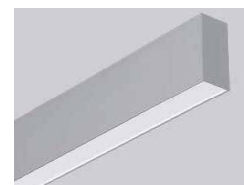

1200mm	80W	12800lm	144leds	1100lux
1600mm	160W	25600lm	288leds	2000lux
2400mm	320W	51200lm	576leds	3400lux

Seamless Linear Lighting Easy driver replacement /Clixx Connect LP5270- Single length From 1.2M customized to 30M

The glare control opal polycarbonate filter, a remarkable innovation in the realm of PC lenses. Available in convenient rolls, this cutting-edge concept is set to revolutionize the world of lighting by providing exceptional luminous uniformity.

The snap-in diffuser combines flexibility with longevity. Its external microprismatic design ensures optimal light diffusion, while the internal anti-glare opal polycarbonate filter guarantees a pleasing and consistent illumination. The advanced extrusion process & manufacturing technique utilizes high-quality thermoplastics like PMMA, PC, and ABS to create these diffusers, delivering both exceptional performance and aesthetic appeal.

Our state-of-the-art machinery, which enables us to produce diffusers with a wide range of material properties. This ensures that every component is precisely tailored to meet our customers' specific requirements and surpass their expectations. Lumeplus our glare opal polycarbonate filter, achieving optimal luminous uniformity has never been easier.
